-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

1. The examiner acknowledges receipt of applicant's amendment, filed 25 May 2005. To clarify the record at this point in the prosecution, claims 1-24 are pending.

2. Per MPEP §§ 811 and 811.02, the examiner makes the following requirement:

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of applying a barrier coating to pipes, classified in class 427, subclass 230.
- II. Claims 10-18, drawn to a method of mixing and applying a corrosion barrier to an existing pipe system in a multi-story building, classified in class 427, subclass 230.
- III. Claims 19-24, drawn to a method of applying a barrier coating to pipes, classified in class 427, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions are not disclosed as capable of use together and have different modes of operation. For example: Invention II requires an epoxy barrier coating while inventions I and II do not; Inventions I and III require an dry particulate/abrasive, while invention II does not; and

Art Unit: 1762

Invention II requires that the piping system not be disassembled and returned to service within 96 hours, while Inventions I and III do not.

5. Because these inventions are distinct for the reasons given above and the search required for Group II (epoxy barrier coating) is not required for Groups I and III, restriction for examination purposes as indicated is proper. Further, because the search required for Groups I and III (dry particulate) is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Fletcher III whose telephone number is (571) 272-1419. The examiner can normally be reached on Monday through Friday, 9 AM to 5 PM.
